FAVOUR ONUOHA

PROFESSIONAL SUMMARY

I am a Senior Software Developer at Eganow and also a content creator

I am self-taught and I love talking & writing about Web3, web development, & software development in general.

I have been coding for over 8 years and am currently a Backend Fintech Engineer with experience in working with Core Banking Services with extensive knowledge of building USSD (short codes) and working on mobile money frameworks having integrated and worked with teams from the major Telecos in Ghana.

My favorite programming languages are JavaScript, Python, Java, and C# and I use a variety of frameworks like Django, React, Node JS, Express JS, ASP.NET Core, and Angular.

I am on a journey to make Web3 knowledge accessible to everyone.
